What Sets Global Tech LED Apart

Global Tech LED offers a product unparalleled in the industrial and commercial lighting industry. Focusing primarily on retro-fitting existing HID fixtures, our products are revolutionary in our offering an LED retro-fit insert that produces better results, a return on investment in 18-24 months, and carries a 10 year guarantee. With well over 100,000 units installed in the field, we have perfected an option which is easy to install and fits 99% of applications – we have yet to find a fixture we can't retro-fit. We offer solutions for high mast, cobra, high bay, shoe box, sportlighter, garage, and flood lights. Our LED lights are proven to last over 100,000 hours compared to 8,000 to 10,000 hours for a compact fluorescent and 20,000 to 30,000 hours for a linear fluorescent bulb. Conventional lightbulbs waste most of their energy as heat. LEDs remain cool. In addition, since they contain no glass components, they are not vulnerable to vibration or breakage like conventional bulbs.

One key feature which sets us apart is breaking through the directional nature – with our customized lenses, we can fully control where the light is directed. We also use reflectors and refractors for applications where direction is necessary. With dimming, solar applications, and motion technology, we set ourselves apart by offering a range of options, which is necessary in the universal application of our product. Our patented on-board software and Solstice engine our product is able to regulate itself over time. All of our units utilize this technology and our 3 models – the GTSOLM21, GTSOL2754, GTSOL5498. With a variety of accessories offered, we utilize these three models in each application we retro-fit. As technology continues to change, our products will be able to be upgraded.

Finally, Global Tech LED also sets itself apart as being committed to keeping jobs in the United States and all our products are made in the USA. Our family atmosphere and work environment are also key aspects that we feel sets us apart. When you call our office, you will deal with a great group of people who is committed to excellence as well as encouraging each other each day. I am proud of our team here at Global Tech LED and invite you to learn more about us and our products. [Contact us](#) today.

At Global Tech LED, our commitment is to excellence in lighting design and manufacturing as well as keeping jobs in the United States. We appreciate your support.
